

Know Valuebase

Message

For 17 years, each and every one of us at Valuebase has worked tirelessly with passion to improve our skills and work with a high level of awareness in order to inspect products that are useful to the world. This DNA has been passed down to the present, and all employees are united in their efforts to contribute to the development of local communities through inspection.

A job site is not something that can be completed by one person alone. We must communicate with a diverse range of people, including customers and subcontractors, to form a team. In addition to technical skills, flexible adaptability is also necessary, and the team, or sometimes a single person, must face various difficulties on site.

And after overcoming difficulties, a great sense of excitement and accomplishment is born. Furthermore, what you have been involved in will become part of the infrastructure and support people's lives for the next generation. In our screening process, we encourage you to put yourself forward and share your passions, such as your dreams, what you would like to do at our company, and what you devoted yourself to during your school days, on a barrage basis. We will do our utmost to support you.

As a member of Value Base, let us play a leading role in the new future, inherit the "technology" and "passion" that have been handed down since our founding, and support local communities. Let us grow together toward the next 20th anniversary and create the future together.

VALUEBASE CO., LTD. Representative director SHIGEKI KOYAMA
